Make a Dental Health Tip Poster

• Pass out the poster templates. Walk students through each element.

• **Slogan:** The headlines on pages 1 and 2 of the article (“Too Much Toothpaste?” and “The Truth About Teeth”) are good examples of “catchy” sayings because they include words that start with similar sounds. Point out that words that rhyme can also be catchy. Students can write anything that sounds fun to them!

• **Dental Health Tip:** Students should write what they think is an important tip from the article. Have them write why it’s important. This should make others think it’s important too!

• **Picture:** Have students draw a clear picture of their tip. This will help others do it correctly.

• You can display children’s posters in class or in the hall for Dental Health Month.
Make a Dental Tip Poster

**Teachers:** For this activity, students will use what they learned about dental health to make a poster showcasing their favorite dental health tip!

Pass out the poster template on the next page. Walk students through each part of it and how they should fill it in.

**Slogan**

A **slogan** is a short, catchy saying. Write one here to make people want to read your poster!

**Dental Health Tip**

What do you think is the most important thing you learned about dental health? Write it here!

**Picture**

Draw a picture to help people understand your tip.
